CERTIFIED MAIL
(Return Receipt Requested)

Paul Spor
North Lily Mining Company
PO Box 421
Eureka UT 84628

Dear Mr. Spor:

Subject: Ground Water Permit Renewal; Ground Water Permit No. UGW230001

We want to remind you that your ground water permit expires in May, 1996, and that it is required that it be renewed for your continued operations (R317-6-6.7). The need to submit closure requirements for your facility were stated in letters dated May 20, 1994 and May 11, 1995.

Since the rinsate from the pads does not meet ground water standards at this time, we believe an approvable closure plan needs to be included in the renewal process. Because of the short time left until your permit expires, an application should be started as soon as possible. The easiest procedure to follow in renewing the permit, would be for you to review your copy and note any changes required, different procedures you will be using, and informing us, in writing, of these changes. Additions to the permit needs to include your closing procedures. We will then review your current permit, make the necessary revisions and update. We will then send it for a 30 day public notice. Failure to reapply for a permit would constitute noncompliance with the rules, and could be cause for a compliance action against the company under Section 19-5-115 of the Utah Water Quality Act. You may want to schedule a meeting during the repermitting process.

There is a \$60.00 per hour charge, for our time used in the renewal process.

Sincerely,

Mack G. Croft, Environmental Scientist
Ground Water Protection Section
